Profile

For the last 12 years I have worked in the IT department of the Swedish company Sandvik, where I have gone from a Service Desk specialist to an IT infrastructure manager for Russia and the CIS. In my work, I devoted a lot of time to automating business processes using scripts and web applications, and in the end I realized that these tasks are the most interesting for me. It seems to me that now is a great time to change specialization.

Strengths

Collaborative

12 years of work experience in multicultural cross-functional teams located all around the globe.

Eager to learn new skills

As a person switching his specialty I'm constantly seeking for new ways to grow and expand my skills.

Result-oriented

IT Infrastructure manager position taught me to focus on the result and looking for most efficient ways to achieve it.

Projects

Personal Portfolio/CV site

MAY 2023

Written with JavaScript and migrated to TypeScript. Responsive web design included.

Stack: React, JavaScript, TypeScript, CSS, SASS, Git

Tanner Web App

JUN 2023

Tanning assistance application designed for mobile, deployed on personal server.

Weather and UV index data gathered from free API's and consolidated on API proxy to bypass the limit on the number of free calls.

Stack: React, JavaScript, TypeScript, CSS, SASS, Git, API

Chrome "New Tab" extension

AUG 2022

Educational Chrome "New Tab" extension with changeable background depending on time of day, weather widget, custom favorites and switchable searchbar for Google/Youtube.

Stack: React, JavaScript, CSS, Git
